

Respiratory Restart in Primary Care - Hitting the ground running

1. Page 1

1. Why did you decide to attend this webinar?			Response Percent	Response Total
1	Open-Ended Question		100.00%	26
1	1	to look at how we can restart services in line with latest guidance.		
	2	I was wanting to see when we would be restarting spirometry in practice and how it would be performed in view of the pandemic.		
	3	for guidance restarting respiratory reviews during the pandemic and update re QOF		
	4	to find out when can restart spirometry and safety issues for it in GP		
	5	to find out when we would be able to restart spiro and check new updates		
	6	wanted to have an update for spirometry, and wanting to know how this would start5 back up and when		
	7	was advised update going forward post covid re spirometry		
	8	Information re spirometry		
	9	Brilliant		
	10	up to date info on respiratory		
	11	I am a resp nurse. Doing spiros. Needed an update.		
	12	To see what the plans are for a re-start of respiratory services in Primary Care		
	13	Annual update		
	14	Respiratory Nurse led for my GP practice.		
	15	ACPin Primary Care looking at restarting Spiro / Safely - wanting guidance and food for thought . Looking at a better way of working - specialist clinics - PCN level with Resp team available / one stop shop . What level of knowledge is needed .		
	16	To see when and how spirometry will be starting in primary care		
	17	To learn about restarting spirometry in a (post)covid world		
	18	Needing up to date information regarding respiratory and spirometry		
	19	I am the respiratory nurse for a GP practice and wanted to update on pathways post covid		
	20	Because I am so rusty with regards to spirometry and it's interpretation. New practice just before lockdown and new equipment which I am not familiar with. No one in practice to show me how.		

1. Why did you decide to attend this webinar?

			Response Percent	Response Total
21	Because I was performing spirometry and wanted to know about restarting this			
22	To get an update on recommendations for primary care			
23	wanted info on restarting spirometry and how to do so as part of respiratory care restart			
24	Needing updates and guidance for Respiratory patients following covid 19 restrictions			
25	To see if we could safely restart spirometry			
26	Have an interest in spirometry and I am the lead nurse in this at my current place of work .Wanted an idea when we could restart			
			answered	26

2. Do you think this webinar achieved its goals of taking you through how to safely restart spirometry in primary care?

			Response Percent	Response Total
1	Yes		54.17%	13
2	No		45.83%	11
			answered	24
			skipped	2

Comments: (18)

1	would be easier at PCN level
2	to a degree, though there are still some unanswered questions such as who will perform, if it'll be done at practice level or PCN level.
3	very informative
4	excellent and informative in areas covered but nothing at all on brief given and sold to myself
5	Need to see the flow chart of how to proceed
6	Unable to log on
7	We need more clarity regarding safety. Our practice were using the viral/ bacterial filter masks even prior to covid. I do not see how these will protect staff and the patients.
8	Waiting for the guidance / flows and patient leaflets .
9	The webinar talked briefly about restarting spirometry but didn't talk much about the safety aspects of restarting spirometry (e.g ppe, aerosol generating procedure). We were expecting it to talk more about this than QoF indicators.

2. Do you think this webinar achieved its goals of taking you through how to safely restart spirometry in primary care?

		Response Percent	Response Total
10	Still awaiting full guidance but important to have an awareness		
11	Still awaiting guidance		
12	But I need some one to one guidance on the equipment		
13	To some extent - although we seem to need to wait for information/advice statement at end of month		
14	I was unable to get onto the webinar		
15	was a good webinar but do not really feel we were given enough info on how to safely implement the practical side of spirometry safely		
16	feel more very detailed guidance needed re. infection control .		
17	It was said that spirometry isn't an aerosol generating procedure but a cough is. Not sure we could remain safe in an environment where some patients performing spirometry cough when blowing.		
18	would have liked a date as to when we could start but aware awaiting information from another source		

3. Did you find the webinar content easy to follow?

			Response Percent	Response Total
1	Extremely		52.00%	13
2	Very		44.00%	11
3	Not at all		4.00%	1
			answered	25
			skipped	1
Comments: (2)				
1	Just need to know if my surgery is included... we are in Craven North Yorkshire			
2	Unfortunately couldnt log on			

4. How satisfied were you with the virtual webinar experience?

			Response Percent	Response Total
1	Very satisfied		34.62%	9
2	Satisfied		38.46%	10
3	Neutral		15.38%	4
4	Dissatisfied		7.69%	2

4. How satisfied were you with the virtual webinar experience?

			Response Percent	Response Total
5	Very dissatisfied		3.85%	1
			answered	26
			skipped	0
Comments: (7)				
1	occasional disjointed on speaker			
2	Took a bit to log on			
3	please update practicalities going forward re lung function testing			
4	Very good speaker			
5	I watched it on Tuesday. We could not access last Friday(live) as did not get tickets. Our manager set up the link, but we couldn't attend.			
6	I could not access the webinar, it just kept says "Oops something has gone wrong" when I tried to join			
7	really useful ,clear accurate information given			

5. What was your biggest takeaway from the webinar?

			Response Percent	Response Total
1	Open-Ended Question		100.00%	21
1	to ensure we do service safely			
2	Looking forward the the flowchart/SOPS in June.			
3	a better understanding of QOF and the reassurance all GP practices are in the same position			
4	new innovations pleased to know we are doing things correctly			
5	need for further updates			
6	re use of FeNo			
7	qof updates			
8	I felt included having been isolated to a large extent. Felt very comfortable asking simple questions and not feeling daft!			
9	More knowledge on the process that will be gone through to get started again			
10	Restarting spirometry in each practice will be extremely time consuming. We are a large practice who have an extensive list of patients with suspected COPD and asthma awaiting diagnostic spirometry - this is prior to performing Qof spirometry.			

5. What was your biggest takeaway from the webinar?

		Response Percent	Response Total
	Unfortunately we may not be able to achieve this but we will try and provide the best care possible to our respiratory patients.		
11	A full page of bullet points that have been shared . Shake up the old practice -redesign and also look at better ways of treatment diagnosis and acute care . STOP multiple issues of antibiotics without reassessment 😊		
12	The question asked at the end, so basically there will be a paper/SOP coming out shortly as to when we can start again		
13	QoF indicators. The Harrogate and West Yorkshire platform.		
14	Difficult to day as the main objective was not reached		
15	The enthusiasm of the speaker and knowing many others will be in the same position as me.		
16	Asthma needing spiro on QOF. 25% of copd patients misdiagnosed. To sign up to ICST.		
17	I will need to look at slides at another time but disappointing		
18	Changes that have been made to respiratory indicators for QOF for this year and what is required of us		
19	Asthma QOF		
20	Discussing how spirometry services may be run in the near future		
21	motivation		
		answered	21
